

BMD Laboratory

PT Bisa Mandiri Strategi Investasi
(BMD Street Group Corp)

Company Profile

Competent and

Leading in quality of service

Company History

Existence BMD Street Group as provider training and consulting services laboratory since 2007. Get a full appreciation from our customers until today. Currently we already serve more than 1000 organizations in various fields, come from: industry, government, education, hospitals, non-profit organizations and so on. This belief we respond by continuing to improve customer satisfaction and service. This is what raises our passion to develop more specific laboratory services. In the end we build our focus BMD Laboratory as providing services in the field of laboratory.

We provide services and continue to grow in the future in accordance with market needs. Until now we have provided services such as: training and consulting, proficiency testing (chemical, microbiology and calibration), laboratory calibration and testing, research and development, technology provider, trading for instruments and laboratory chemicals.

Vision:

Become a leading laboratory in Indonesia with the widest network in national and international scale

Mision:

We focus on the targets and client expectations, company's business us will always focus on the same path to customer needs today and in the future
